Happenings in and Around Bellevue

A few of the dancers from Bellevue went up to Blairmore on Monday.

Mrs. Allan, of Coleman, was visiting Mr. and Mrs. Atkinson on Sunday last.

The basket social held on Wednesday night of this week proved a grand success.

The dog belonging to Sergt. Bowers was killed by the local on Saturday night last.

A son has been born to Mr. and Mrs. Watts Goodwin. Mother and child are doing well.

Peter Ratcliff visited Fernie for a few days last week end and stayed with his parents there.

The Rev. W. H. Irwin visited Livingstone last week end and preached in the Methodist church there.

In cases of rheumatism relief from pain makes sleep and rest possible. This may be obtained by applying Chamberlain's Liniment. For sale at all dealers.

Mrs. Erskine, of Fernie, is in town for a few days and is staying with Mr. and Mrs. Andrew Goodwin.

A large crowd of Bellevue sports went up to Blairmore on Saturday last to see the fight between Morris and Marshall.

Mrs. D. Davidson and family and Mrs. Gill Cousins, of Fernie, came to take their abode in Bellevue with their husbands last week. Lame Shoulder is nearly always due to rheumatism of the muscles, and quickly yields to the free application of Chamberlain's Liniment. For sale at all dealers.

Next Sunday night the memorial service for the late William Buchanan will be held in the Methodist church to be conducted by Rev. W. H. Irwin.

An accident occurred in the No. 1 mine to J. R. McLeod, whilst he was getting down some top coals with his pick. It came down unexpectedly and drove the pick into his foot. He was taken out of the mine and attended to by Dr. MacKenzie.

The preacher at the Methodist church on Sunday night last was Mr. Hyslop, of Coleman, who took for his text Matt. chap. 8, verse 1. Mr. Hyslop divided his sermon into two headings, "Discipleship" and "The place of the Cross in our hearts."

The inquest into the death of William Buchanan was held last week. The verdict stated that deceased came to his death accidentally by a fall from roof of No. 2 seam of No. 1 mine, where he was working on April 13th. It was also recommended by the jury as follows: "That we, the jury recommend that there be an amendment to the Coal Mines Act of Alberta that no person holding a fire boss certificate be allowed to fire shots doing contract work in a gaseous mine. Furthermore that we, the jury, find that the present system of contract work tends itself to carelessness on the part of the contractors. Though not blaming anyone for the deceased's death, we feel that greater precautions could be taken to safeguard the men from accident." The jury consisted of J. Cunningham (foreman) Wm. Evans, J. I. Walters, J. S. Murray, Thomas Duncan, Harry White and W. H. Cole.

"Our baby cries for Chamberlain's Cough Remedy," writes Mrs. T. B. Kendrick, Hesperia, Ga. "It is the best cough remedy on the market for coughs, colds and croup." For sale at all dealers.

A Bigger, Better Bellevue

Things are booming at Bellevue these days, and several more business places are in course of erection.

The West Canadian Collieries are sub-dividing about 240 acres and are placing some on the market. Already no less than six live business men, residing in different parts of The Pass, have bargained for suitable sites on which to erect large buildings, in which they intend to conduct several branches of the mercantile trade. More space will be devoted to this matter in a near issue of this journal.

A Race Track Needed

--Death is Cheated

On Saturday last Blairmore was the scene of not less than three runaways, and levers of the turf have come to the conclusion that Blairmore should have a track where such events as those mentioned may be put on in safety and witnessed by a large number of persons interested in horse racing. The first attraction of this kind was witnessed at 5:30 p.m. when a horse attached to rig made an attempt to get away from its driver when passing along Victoria street. But although the driver was thrown out of the vehicle he dauntlessly held on to the reins and got control of the animal after the latter had dragged the man nearly a block. The driver, however, was not hurt. The doctor attended the wounds and the rig may now be seen on one of our back streets.

The second event of this character took place about 7:30 p.m. when a team of staid horses belonging to the West Canadian Collieries and driven by "Scotty," attempted to race along Fifth avenue towards the mine. The driver was thrown out and received slight bruises but the animal was stopped before it had time to go very far. This affair was the first free attraction witnessed by several passengers who had just then gotten off the west-bound "local."

The third and last attraction of this nature occurred at 8:15 p.m. when a team of young horses which had been in town for only a few days and which evidently had not accustomed themselves to our easy going streets, broke away into a fast gallop shortly after leaving Thomson & Co's store with a load of choice groceries to take to the people for Sunday consumption. The animals rushed madly down Victoria street to Eighth avenue where place they were no doubt attracted by one of Blairmore's legal lights which penetrated the darkness. The horses then came over near the Enterprise building where the wagon exploded and the contents dumped near the sidewalk. The team followed down Eighth avenue to below State street where they were finally gotten under control. Driver Patterson deserves credit for the noble British spirit he displayed in staying in the wagon until the two or three passengers were gotten out in safety. If the boys had not left the wagon when they did, it is more than likely that the cortege would have borne some mother's son to his last resting place the early part of this week.

Mrs. J. R. Warner

First-Class Dressmaking

Tenth Avenue & Main Street S

Happenings in and Around Frank

BORN—To Mr. and Mrs. Frank Weir, of Frank, on Monday, April 22nd, a daughter.

A. J. Holtmoltz, station agent here, left on Tuesday for Cayley where he will take up a similar position to the one he held at Frank.

The Canadian Coal Consolidated, Limited, have decided to have a number of their houses removed to the new townsite, and are calling for tenders for the work.

Many improvements are being made to the grounds surrounding the Rocky Mountain Sanatorium. The grounds are being nicely graded off and trees and shrubs planted.

A. V. Lang's store is being besieged with patrons these days, all of whom are taking advantage of the monster clearing out sale, which apparently will leave his large stock of dry goods and groceries 'doomed.' Mr. Smith, an experienced and genial salesman, has been engaged for several weeks by Mr. Lang, and his efforts are being fully rewarded.

A. Macneil, proprietor of the Frank hotel, will erect a large hotel at Burmis, and plans are being arranged by E. Disney, of Coleman. A splendid site has been secured and the work of construction will shortly commence. The new building will compare favorably with any of the hotels in the neighboring towns, will be fitted with all modern appliances and cost upwards of \$20,000.

The Rocky Mountain sanatorium will give a ball on Friday evening of this week. This will be given on the occasion of the opening season 1912 of that institution. A full orchestra will be in attendance and everything possible is being done to make the affair a splendid success. Dancing will commence at 9 o'clock in the spacious dining room which will be suitably decorated for the occasion. Supper will be served at midnight in the large hall in the basement.

Constipation brings many ailments in its train and is the primary cause of much sickness. Keep bowls regular, madam, and you will escape many of the ailments to which women are subject. Constipation is a very simple thing, but like many simple things, it may lead to serious consequences. Nature often sends a little assistance and when Chamberlain's Tablets are given at the first indication, much distress and suffering may be avoided. Sold by all dealers.

Doyen Perfects Cancer Cure

Paris, April 21.—In a paper read before the Physiotherapeutic Congress here, Dr. Doyen declared that he was now able to confirm his theory that it was possible to cure cancer without a surgical operation by means of an electric treatment, which he described as "thermic electro-coagulation." In all the cases treated, said Dr. Doyen, the cancer was easily accessible. They included cancer affections of the skin, lip, tongue, tonsils, and other organs.

Dr. Doyen has been experimenting in this direction since 1901. In his treatment, which in the case of external cancerous affections, necessitates special electrical apparatus, he depends upon the curative value of the penetrating heat produced by an electric current of high frequency and low tension.

The last execution which took place in Macleod occurred on January 5th, 1908, when Mah Hong, the Blairmore Chinese, was hanged at the Barracks for the murder of his brother.

"Miss Nobody" From Starland"

With not one dull moment and full of wit and humor, sparkling musical numbers, with gorgeous costumes and wonderful scenic effects, "Miss Nobody From Starland" should prove a more than agreeable offering at the Blairmore Opera House on April 30. This musical comedy is one of the best and most popular of the many notable productions placed before the public by Mori A. Singer. The book and lyrics are by Adams, Hough and Mitchell, all of whom have had a part in previous Singer successes, and the music is the work of prolific Joseph E. Howard, whose agreeable songs are heard all over the world. Olive Vail, the clever delineator of the title role, and a widely known favorite will head a large cast of well known principals.

A MOTHER'S DUTY TO HER DAUGHTER

Her Health Must Be Carefully Guarded As She Comes to Womanhood.

Every mother who calls to mind her own girlhood knows how urgently her daughter is likely to need help and strength during the years between her school days and womanhood. Then it is that growing girls droop, become fragile, bloodless and nervous. Nature is calling for more nourishment than the blood can supply, and signs of distress are plainly evident in dull eyes, pallid cheeks, weak and aching backs, a languid step, fits of depression, nervousness and a dislike for proper food. These signs mean anemia—that is bloodlessness. The watchful mother takes prompt steps to give her girl the new, rich food her weak system is thirsting for by giving her Dr. Williams' Pink Pills, because so many thousands of feeble, anemic, unhappy girls have been transformed into robust women through the rich, red blood these pills actually make. No other medicine has ever succeeded like them, and thousands of mothers have proved their worth. The case of Miss Margarette Boisclair, of Quebec, Que., proves the truth of these statements. Miss Boisclair is sixteen years of age, and says that since the age of thirteen or fourteen she had been afflicted with extreme weakness, and seemed to be going into a decline. The least effort left her weak and breathless, so that she was unable to do any household work. She had no appetite, suffered from terrible headaches, dizziness and sometimes fainting spells. She was under medical treatment but absolutely no improvement. In fact seemed to be steadily growing weaker. When her case seemed most hopeless a lady friend advised the use of Dr. Williams' Pink Pills. After taking a few boxes she began to gain new strength, and after the continued use of the pills for about two months she was again as well and strong as ever she had been, and has since enjoyed the best of health.

Sold by all dealers in medicine or by mail at 50 cents a box or three for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Sweet Little Harry.

"Ma," said little Harry, "I'll tell you." "What, dear?" his mother asked. "You ought to be a doctor and live in some country where the people are Nummedians."

"What on earth ever put such a thought as that into your head, dear?"

"Cause over there they think an fat women are beautiful."

"Harry! If you dare to open your mouth again this evening you will be sent to bed with nothing to eat."

Gus Burns, Etc.

While the great Roumanian scheme for a pipeline from the oil fields of the sea hangs in the air, several new pipelines are being constructed in the country, notably by English interests.

It is the intention to lay two lines, each of four inches diameter, one for heavy crude and the other for light between Moroni and Ploesti.

Some interesting experiments showing that the yield of plants may be increased by electricity and described in a recent official report published in Berlin. Success was also achieved in hastening the ripening of strawberries by several days, thus enabling the growers to command the highest price at the beginning of the season.

A simple and good rule to remember and to follow is to buy nothing in the baking powder line unless all the ingredients are plainly printed in English on the label. This information is stated on every package of Magic Baking Powder. All Grocers sell it.

Remarkable Discovery

An engineer of Fulda, it is stated, has discovered a means by which submarine mines may be exploded by Hertian waves. He has, it appears, invented a powder as explosive as is sensitive. It is said that the explosion is brought about by the influence of the electricity upon the powder.

"My husband has given me a checking account."

"Isn't that lovely? Now you can buy anything you want, and just write out a cheque for it."

"Yes, I'm rather sorry on one account, though. It seems such a lot of trouble to have to write out a cheque for one's car fare, especially when the cars are crowded or when you have to pay as you enter."—Chicago Tribune.

Women use seventeen times as many gloves as men. Every year Australia exports one hundred tons of gloves.

FOR THE WOMAN WHO THINKS AND FEELS.

Some women complain that they periodically suffer from dull and heavy feelings, or dizziness in the head, nervousness, and other ailments which should not occur to the normal healthy woman. But most every woman is subject to these pains of some time in her life, due to abnormal conditions in life, such as coarcted, overtaxed strength, bad air, poor or improper food, wet feet, sluggish liver, etc. A regulator and female tonic made from native medicinal roots with pure glycerine, and without the use of alcohol, called

DR. FIERCE'S FAVORITE PRESCRIPTION,

has proven its value in thousands of cases, of the following:

MR. DONA M. MARVIN, of Auburn, Me., writes: "I have used your favorite prescription for several years, and it has done me a great deal of good. I have been suffering from nervousness and general weakness for many years, and your medicine has cured me. I have been suffering from nervousness and general weakness for many years, and your medicine has cured me. I have been suffering from nervousness and general weakness for many years, and your medicine has cured me."

DR. FIERCE'S GREAT FAMILY DOCTOR BOOK, The People's Common Sense Medical Adviser, newly revised up-to-date edition, 1000 pages, covers both sides of the coin, giving every woman, single or married, ought to know. Sent free in cloth binding to any address on receipt of 50 cent stamps, to cover cost of wrapping and mailing only.

To The Queen's Taste

The King has brought much Indian treasure back with him—that is to say, the Medina carried on the homeward journey many things which his Majesty, as a collector, regards as rather treasurable. For each thing that is brought home, it may be said, roughly, something has been left behind. The ship's bookshelves, even, have been overhauled. Many a volume went out on its trial, and did not survive the close scrutiny under which it passed during the days of dreadful seas. Certain books on Indian history served their purpose before the Dunbar, and the encounter with the descendants of innumerable royal Indian houses will not be called upon, in these particular editions, again. Of the fiction, since his Majesty is a close follower of such literature, no great clearance need have been made, for the books were not chosen at haphazard. "A good book for a journey, sir," does not pass for sufficient recommendation in his Majesty's case. Of the rather unexpected volumes, we may mention Wordsworth's poems, George Horrow's "Lavengro," and Sir William Butler's "Monsters" as indicative of the breadth of the King's taste in serious literature.—Sketch.

Minard's Liniment Co., Limited, Montreal. My daughter, 15 years old, was thrown from a sleigh and injured her elbow so badly it remained stiff and very painful for three years. Four bottles of MINARD'S LINIMENT completely cured her and she has not been troubled for two years.

Yours truly, J. B. LIVESQUE, St. Joseph, P. O., 18th Aug., 1900.

The West

I will sing a song of the Westland wild, Where the plains are like a floor, Where heavens by smoke are undecorated.

And the tempests rage and roar; Where the sky is like a great blue bowl.

Above a stretch of white, And wide the tumbleweeds run and roll, Unhindered in their flight.

I sing you a song of the level land, Where the wilds are fresh and free; Where never a hut in the silence stands.

And never a leafless tree; Where the wolf and the coyote roam the day.

And send through the sulken night To hunt for the wounded buffalo. That has vanished away from sight.

I sing you a song of the boundless sky, Of its great blue roof, the sky, And the tide of pride that fills the breast.

When prairies grove the crow, Of the trackless wastes of snow that gleam.

Where the grasses lash the frost, And the snowdrifts stand and frown. Jack Remington, in the St. Paul Pioneer Press.

Only One "BROMO GUINNESS" That is TAXATIVE BROMO GUINNESS. Look for the signature of E. W. GORE. Buy the bottle you want to Cure a Cold in One Day. 25c.

Chinese View of Millinery Speaking to a Chinese gentleman the other day, an Englishman asked the man and go in for Western headgear. In reply he beamed a smile most common and bland.

Pressed for something more definite he remarked: "Did you not know that it is a well known fact among the Chinese that the reason so many European husbands look harassed and careworn and are further reason why so many of your young men refrain from marriage is this very question of millinery. Ladies' hats cost so much that they spell ruin, and so we Chinese have told our women folk that we absolutely forbid them to follow Western fashions in this regard, whatever they may do in other directions."—Peking News.

Coy—How few people attended the funeral of Dr. Pillman!

Boy—Well, they do say things that most of his patients went before him. Judge.

Miss Simpson—Kin you cut mah initials on de old, Mistah Johnson? Ma name's Gertrude Lineth Anger. May Gladys Penelope Dorothy Simpson.

Mr. Johnson (dubiously)—Wal, I could do that, Miss Simpson, but it would spoil de pond for skatin'—Puck.

Navy—Yas, doctor, I still got that awful pain.

Doctor—Does it hurt you much?

Navy—Yas, it gives a awful twinge every time I twist.

Doctor—But you musn't twist.

Navy—I don't.—Punch.

LESS TIME IN THE KITCHEN
MORE TIME IN THE FRONT ROOM

That's your reward if you let MOONEY'S BISCUITS take the place of the bread and biscuits you bake yourself.

You'll find MOONEY'S a delightful substitute for your own best efforts—the family will like them. Because

MOONEY'S PERFECTION SODA BISCUITS

come to you straight from the oven in the big Winnipeg factory.

They have that freshness and crispness only to be found in a newly made biscuit. No other biscuit can come to your table as fresh from the oven as MOONEY'S.

Get the big package or the sealed tin—both of them damp proof, dust proof, dirt proof—and

"LET MOONEY DO IT"

Laughed Out of His Name. It is hard to be laughed out of one's surname. That is what occurred to an inoffensive gentleman, Charles Salnabar Pickwick, Esq., who after the publication of Dickens' famous novel felt constrained to advertise in the Times informing the world that he was not the author of the name. This was the more hard in his case because he proudly traced his name to a knightly origin from "Pleas-vile"—"pur-fair."

Jamie, having come into the possession of considerable wealth through the death of relatives, was thus addressed by one of his neighbors: "Ay, Jamie, it was a good thing for you that your rich friends wair."

"Well," said Jamie, "I'm nae sae sure about that—but it was a guid thing that they de'd afore me."

Sheep as Burden Bearers In the northern part of India sheep are put to a use unknown to the European countries. The mountain paths among the foothills of the Himalayas are so precipitous that the sheep, more sure-footed than larger beasts, are preferred as burden carriers.

The load for each sheep is from 10 to 20 pounds. The sheep are driven from village to village with the still growing, and in each town the farmer's sheep as much wool as he can sell there and loads of the sheep with the grain he receives in exchange. After his flock has been sheared he turns it homeward, each sheep having on its back a small bag containing the purchased grain.—Westminster Gazette.

Wireless communication is to be maintained with Dr. Mason's expedition to the South Pole by means of intermediate stations between the exploring party and Hobart.

Locating the Heat Smith—How is your new furnace working these cold days?

Jones—It doesn't give as much heat as the man who sold it to me.—Cleveland Plain-Dealer.

Rulers' Peculiar Homes The craze for peculiar homes has never been apparent in the character of a King or Queen of England, but in many other countries reigning monarchs have fallen to the fancy.

For instance, a native Prince of Java has cooled his palace by making a stream fall in a cascade over the gateway.

The czar Paul constructed a room formed entirely of enormous mirrors, where he spent hours walking to and fro in full uniform—a peculiar taste, seeing that he was one of the ugliest of rulers.

A Russian Empress built a palace of ice and when a courier offended her he was condemned to spend a night in the chilly silence of the chamber of State, where he was almost frozen to death.

Doing the Courageous. Courage is a most excellent quality of soul, but like some other excellent things, it is not always accurately estimated. We think of it generally as an aggressive virtue, but as often, the not it is the very opposite of that. To admit that one is wrong; to do at the call of duty the task we do not like, when we might escape it for some more pleasant; to endure misrepresentation and misunderstanding rather than aggravate the situation by trying to explain—any one of these things may require of us the finest type of courage of which we are capable. Courage must be aggressive on occasion, but the most beautiful exhibitions of it the world has ever seen have been made by men who refused to be aggressive, because there was a higher, if a harder, way.—Christian Guardian.

Not only this but these as well

DON'T think that concrete can be used only for building bridges, silos, walls, and walks; because if you do, you will probably overlook all the places where you can use it.

T. L. Irving, of North Georgetown, Quebec, used concrete for 81 different purposes on his farm in 1911.

There are probably at least a dozen profitable uses for concrete on your farm at the present moment.

Perhaps you didn't think of concrete, except for a new barn, or a silo, or some other big improvement for which you aren't quite ready yet. That's why you should read

"What The Farmer Can Do With Concrete"

It will open your eyes to the hundreds of uses that other farmers have found for this material. In plain language, and with the aid of many photographs, it explains just what these uses are, and how they can be applied to your farm.

Concrete can not only be used for all the purposes to which wood has been applied, but also many others for which wood would never be suitable.

It is not only a building material; it's a "handy" material, something that you'll grow to depend upon more and more, as you learn its possibilities.

So write for this book. You'll find it isn't a catalogue, nor an argument for you to buy concrete. Every one of its 160 pages is devoted to telling you just what farmers have done and can do with concrete.

IT'S FREE FOR THE ASKING. Your name on a postal, or in a letter, will bring the book to you by return mail. Or use the coupon. Address

Sneezing as an Omen The only attention we pay to a sneeze at the present day is to endeavor to get rid of the chill which causes it; but a sneeze in the days of old Greece was a matter of great concern and import.

There was then a god of sneezing, and great undertakings would even be abandoned if a man sneezed at an inauspicious moment, the act being looked upon as the oracle of the god. A sneeze between midnight and noon was looked upon as a fortunate sign, but between noon and midnight it betokened great misfortune. To sneeze to your right was lucky; to the left, unlucky. Two or four sneezes were lucky, one or three very unlucky, and any undertaking in hand should if possible be abandoned; more sneezes did not count.

There is a saying in many parts of England today, "Once a wish, twice a sneeze, three times a letter, four times something better." If people sneezed together it was a good sign, particularly if they happened to be discussing business.—Answers.

The Toronto World speaking of the enumeration of English actors, lamented that there is no such thing as a good Toronto voice. That may be so, but the Toronto Triter is no exception.—Montreal Herald.

The annual profit from the Post Office revenues in the United Kingdom, £2,000,000, with its estimated expenses are £21,082,455.

Miss Ann Teek—"I'd like to go shopping with you this afternoon, but the dentist is to fix my teeth."

Miss Pert—"Can't you shop with me while he's doing it?"—Boston Transcript.

NA-DRUC-0 Tasteless Cod Liver Oil Compound

THE "building-up" value of Cod Liver Oil is well known, but its drawbacks have been its nasty taste and indigestibility.

Na-Druc-0 Tasteless Cod Liver Oil Compound has the nutritious qualities of the Cod Liver Oil, without the slightest disagreeable flavor. In it the Oil is skillfully combined with Extract of Malt, Extract of Wild Cherry, and Hypophosphites, making a splendid tonic as well as a valuable food.

Na-Druc-0 Tasteless Cod Liver Oil Compound is particularly good for growing children who are puny or run-down.

In 50c and \$1.00 bottles, at your druggist's.

BERTIE BRAUMONTE
With M. H. Singer's "Miss Nobody from Starland."

Happenings in and Around Blairmore

Mrs. Donnen, of Medicine Hat, is amongst the visitors in town this week.

Walter Knight and C. F. Dunsmore were in town on Saturday from Lundbreck.

Mr. and Mrs. Fitzsimmons came up from Paslaug on Friday evening and returned east the following morning.

That popular play, "Miss Nobody from Starland," will appear at the opera house here on Tuesday evening next.

Mrs. J. Johnson and Mrs. F. Lation were amongst the Blairmore visitors from Macleod the early part of this week.

Mrs. J. B. Reuter and Mrs. Smith, both of Lethbridge, came to Blairmore on Friday and remained here until Monday morning when they returned home.

A local company are making plans for the erection of a fine hotel for the new town of Maple Leaf. Particulars will be announced later.

The "Three Weeks" was greeted at the opera house here, last night, by a fairly large audience—mostly men. The show was relative to some phases of life in the under-world of the large as well as many of the smaller cities, but nothing of a sensational nature was introduced.

W. A. Beebe and the firm of Sick & Simpson are going to erect a fire-proof cement partition on lots 7 and 8, in block 2. This will serve to protect part of the town from the ravages of fire should flames from any of the western burgs threaten to devastate "The El Dorado of the Golden West."

The subject at the Odd Fellows Anniversary service which will be held in the Baptist church on Sunday afternoon next and which will be conducted by Rev. A. S. Tod, R.D., will be "Fraternity." The service will commence at 3 o'clock. Everybody is invited to attend.

The big auction sale conducted by J. M. Carter on Wednesday of last week was largely attended. A large quantity of furniture, jewelry, wagons, horses and miscellaneous wares were disposed of. An amateur real estate pedlar, who no doubt means to shortly do honor to his country and justice to himself, purchased an ancient framed relic of the first king of Judah.

Three young men appeared in police court on Monday morning. They were charged with being drunk and disorderly at one of the local hotels on Saturday last. They pleaded guilty to the charge and each paid a fine of \$2 and \$2.50 costs, thus swelling the exchequer to the tune of \$22.00. They declared that they would lead a better life and that the court would get no more money from them.

Since the fire of last month which carried death and destruction in its wake, T. Ede, one of Blairmore's legal lights, has had a cement wall added to the west side of his block, thus defying the fiery elements. The roof of same building is being made fire-proof, so flames may roar and firemen tire but those inside will chaff at the fire. (Copyright.) The carpenters are busy at the wood work and Mr. Ede expects to have those new premises ready for occupancy the early part of next month.

The telegraphers' hall which was given in the opera house, on Friday evening last, was the greatest event of the kind given here this season. There were over three hundred persons in attendance. A midnight supper was served at the Blairmore hotel and the Palace cafe and a tired and hungry crowd did justice to a large supply of delectable edibles. People were there from far and near. Special cars brought in telegraphers and other men with their wives and sweet-

The C.P.R. passenger service throughout this part of the country is unique and all the trains are arriving on schedule time.

The recent fires in this neighborhood have taught many the necessity of better protection from the fiery elements, and we would suggest that the stores, hotels and all public buildings have installed in a convenient and conspicuous place a 2-inch standpipe and have attached thereto sufficient 1 1/2-inch hose, with a 3-inch nozzle, to reach to any part of the building so that the apparatus might be used should a fire break out in that building. If this is installed the property owners will find that the underwriters will make a liberal reduction in the insurance rates. The owner will also have the "one third risk," which he must of necessity carry, better protected from loss.

It is said on pretty good authority that liquor selling is conducted every day of the week and every hour of the day in some of the houses on the hill between Blairmore and Frank, but a raid is made thereon only once in every three or four months. The landlady appears in court, pleads guilty and pays a fine. She goes away from court and commits the same offence immediately and is permitted to continue doing so for another three or four months when she will be called upon to pay another fine. It is contempt of court to criticize any action of that tribunal, but if what has been meted out to those violators of the liquor ordinance is law, we would like to ask: Is it justice? Why not prohibit the sale of intoxicating liquors there entirely, and if the inmates want to conduct their nefarious work let them go elsewhere.

hearts, and it was the "wee wee" hours of Saturday morning before the happy gathering broke up leaving behind them the splendidly decorated ball room with all its attractions and allurements. We are sorry that for want of space we are unable to even attempt to describe the large number of beautiful gowns worn on this occasion. We are sorry if we have to disappoint any lady on any occasion whatever, but we hope that they will forgive us for this our very first offence.

On Sunday next Blairmore Lodge, No. 66, I. O. O. F., will celebrate the 93rd anniversary of Oddfellowship. The members will meet at their hall on Victoria street at 2 p.m., from whence after preliminary exercises the society, headed by the Bellevue brass band, will parade to the Central Baptist church where the Rev. A. S. Tod, B. D., will deliver an address suitable to the occasion. After service the procession will proceed down State street to Sixth avenue, thence back by way of Victoria street to their hall, where luncheon will be served. A general invitation is extended to Rebekahs and visiting brethren.

At about 10 o'clock on Saturday night last while the boxing match was on in the local opera house, a couple of young cruel and cowardly wretches decided to start an open-air melee. So, determined to carry out their purpose, they repaired to

Ratepayers Repudiate Action of the Council

A meeting of the ratepayers of the town of Blairmore was held in the Dudd hall on Monday evening last. There were nearly sixty persons present, and considerable time was taken up in discussing some municipal affairs.

R. M. Briscoe was appointed chairman, and after the meeting had been called to order the object of the gathering was made plain.

H. E. Lyon stated that the West Canadian Collieries had offered the town of Blairmore land to the value of \$5,000. This land included a site for fire hall and five acres for a nuisance ground.

J. Menard, the newly appointed manager for the West Canadian Collieries, said that when representatives of the town council looked for a site for a fire hall the West Canadian Collieries were not approached regarding the matter. The price asked for the lots which were recommended by the council, was \$1,300. This expense the local coal company were willing to save the town by giving a free site for fire hall and a large parcel of land for a nuisance ground. The fire hall site consisted of two corner lots on Victoria street and east of the telephone office. Other parties offered land at \$150 per acre for nuisance ground. The W. C. Collieries five acres near the mine for nothing.

D. A. Sinclair wanted to contend some statements made by the Mayor, at recent council meetings, regarding the ownership of lots agreed by the council as being suitable place for fire hall but the speaker was ruled out of order by the chairman.

J. A. MacDonald thought that Mr. Sinclair was perfectly justified in talking the way he did since he (Sinclair) declared it was to make plain some remarks which he intended to make later.

D. C. Watt wanted to see the fire hall located in or near the centre of the business section. He believed that the offer made by the West Canadian Collieries was a generous one but the speaker did not consider that the offer was sufficient inducement to have the fire hall erected so far from the heart of the business community.

H. E. Lyon took the floor again and made a very neat and concise speech. He had been informed that considerable gossip had been going on on the streets and that he had been treated unfairly regarding his stand on the fire hall site question. He favored the proposition made by the West Canadian Collieries because he believed that he would be thus serving the best interests of the town. A free site would mean a saving of \$1,300 to spend on equipment. He had been elected by the ratepayers to serve the latter's interests, and the speaker declared that he intended to carry out the wish of the people.

C. J. Pegg favored putting the fire hall in the centre of the town where there would be the greatest danger of losses caused by fire.

Several others spoke among whom were H. Dutil, J. G. Smith, Captain Beebe, J. R. Smith, L. Gales and R. G. Vincent. The latter wanted to get the names of those "who ran the town in debt," but evidently that data was not available.

It was moved by J. Menard and seconded by H. E. Hinds that "we, the ratepayers, by a vote accept the lots for fire hall purposes, and the grounds located south of the town for nuisance ground offered free of charge by the West Canadian Collieries; that a copy of this resolution be forwarded to the mayor and council of the town of Blairmore with the request that they carry out the will of the electors in regard to the property referred to." Twenty-two voted in favor of the foregoing resolution and only two votes were registered against it. Quite a number of ratepayers left the building as the vote was being taken.

the suspension bridge which spans the Old Man river at Seventh avenue and near Water street, where they laid down in their laid and patiently waited for one of Coleman's young sons who finds an irresistibly magnetic power in one of Blairmore's fire daughters. Shortly after 10 o'clock the visitor from the west started on his homeward journey and just after crossing that notable bridge he was

WHAT DO YOU KNOW ABOUT IT?

That's what a customer asked me recently about a patent medicine I had sold for years, and I was forced to admit that he really knew nothing more than what appeared on the label, wrapper and advertising. Some of the claims made were so extravagant that of course I could not do them seriously, but concluded I had better find a line of remedies I knew something about.

Nyal's Family Remedies

Are manufactured by a house with a solid reputation of over half a century. The formulas are exceptionally good ones and are freely furnished to the Drug Trade. There are no quacks, simply because they are honest and have nothing to conceal. If I didn't believe in them I wouldn't recommend them to you. Anything you buy with the name **NYAL'S** will give you satisfaction.

Children and Good Roads

It is pleasing to learn from the officers of the Canadian Highway Association that the children through out Canada are taking a keen interest in the essay competition on "What Good Roads Mean to Canada" and that from all parts of the Dominion papers are being forwarded to the headquarters of the association at New Westminster, B. C.

As an encouragement to the children to busy themselves in the preparation of these essays the president of the Canadian Highway Association, Mr. W. J. Kerr, is offering valuable gold, silver and silver gilt medals, and also a souvenir silver pin to all competitors whose paper attains a certain standard of merit.

What it should not be necessary for this incentive to interest the young people of Canada in Good Roads, and their relation to the well-being of the country, the fact remains that in this, as in other things, some inducement is often necessary in order to awaken the young generation to the economic needs of this country.

Good Roads, as everyone will admit, are badly needed in Canada at the present time, but it is only when the people at large are ready to demand this—not merely to request it, that we can expect the authorities, whether local, municipal, provincial or federal, to act on this matter on anything like a large scale. The aim and purpose of the Canadian Highway Association, as is well known, is to establish a Transcontinental road that will reach from Halifax, N. S., to Alberni, B. C. and while it is not the intention of this organization to do more than educate the public and act in an unofficial advisory capacity, it is yet doing much good work in this cause and will be largely instrumental in getting this Highway, four thousand miles long, completed within five years.

We in this district must do our share of this work, and it behooves the Good Roads advocates of The Pass to beat themselves and lend all the assistance they can to the officers of the Canadian Highway Association in the good work they are doing for Canada.

Boxing Match a Draw

The boxing exhibition given in the Blairmore opera house on Saturday night last attracted a full house. The three round preliminary between "Young" Ronald and "Hurricane" Gallagher resulted in a draw. The main bout was put on at 10.30, both Marshall and Morris appearing in excellent trim. Fred Baynor was chosen as referee and performed his duties satisfactorily to all. Messrs. Wright and Levitt acted as judges and J. Burke as time keeper. The first, second, third, fourth and fifth rounds were very evenly fought. Marshall did some excellent work in the sixth round, which round was given in his favor. In the seventh several effective uppercuts were recorded in Marshall's favor, while Morris dealt several swift punches at his opponent's ribs. This round was declared equal. The eighth and ninth rounds were not creative of much excitement, but both started out in earnest in the tenth and displayed great capabilities and good defensive powers, and all through this round began to raise doubt as to who would be the champion of the bout. Marshall got in several heavy blows at Morris' face and chest, as well as a good stiffener to the back of the neck. In a clinch which followed, Morris well retaliated over Marshall's kidneys. This round was given in Marshall's favor. The next 3 rounds were evenly contested and the judges decided to award equal honors in all three. In the fourteenth both started out with a determination to have the honor of wearing the middleweight championship belt, and all through this round was well fought. Marshall dealt many well-directed blows at Morris' neck and ribs with apparent weakening effect, but towards the finish Morris seemed to survive and mount up in a masterly manner over his opponent. A whole shower of effective punches found way through the defence, but the round terminated in Marshall's favor. The last round was fast fought and honors were about even. From start to finish neither of the combatants was put to the floor, and the match right through was the cleanest and most interesting ever witnessed here. Morris was in the very best of trim; but Marshall was suffering from a broken ear, which injury had been inflicted during previous training. This somewhat handicapped Marshall and prevented him from displaying all the new science punched into him by his trainer, James Burrows. At the conclusion the large audience cheered the combatants, while the judges were preparing to give their decision. The bout was declared a draw, while Morris was declared winner on points. It is expected that several similar bouts will be arranged for the near future. Interest in boxing is expanding, and amongst the audience were noticed the faces of several housewives—evidently taking pointers to assist them in exercising their generalship over the poor "hubby" at home.

A RARE OPPORTUNITY FOR LIVE INVESTORS

Lake City

Is the name of the Western Terminal Point of the proposed Crow's Nest Pass Electric Railway and is already tapped by the Pass line of the C. P. R., while the C. N. R. has already approached to within a few score of miles and must eventually pass through this admirably located town.

Lake City

Is located by the shore of Crow's Nest Lake, only a few miles east of the provincial boundary between Alberta and British Columbia, and just north of the international line. In reality, it is at the top of Canada where the majestic Rockies tower in serene magnificence over great chasms and numerous floods, reflecting their presence on the waters of this beautiful lake. Here also are afforded the very best tasks for the daring mountain climber and for huntsman who desires to outlive the quiet ways of the Rocky Mountain goat, sheep, deer or elk, which are the monarchy thereon. In close proximity are numerous timber, mineral and fuel resources, development of which is now in its initial stages. These resources include gold quartz, coal, iron and pulp wood.

Crow's Nest Lake has long been looked upon with promise as an admirable location for health and tourist resorts, and but now this promise is being realized. Plans for hotels, etc. are being arranged, as well as boat houses, and the most modern pleasure yachts will soon glide over the surface of this beautiful lake.

But a few weeks ago lots were placed on the market, and the agents have had their hands full attending to purchasers. Prices run from \$150 up. For further particulars apply to the agents:

A WONDERFUL RECORD

CANADA'S DEVELOPMENT THE SURPRISE OF THE AGE.

S. James Grant, Discussing Canada, Makes Reference to the Remarkable Results of the Last Quarter of a Century Since the First Transcontinental Train Started For the Pacific Coast.

In a speech delivered before the University of Edinburgh Club at a recent banquet, Sir James Grant, the honorary president of the organization, outlined for the members the wonderful development of the Dominion of Canada. The speaker went on to say that Canada is not an ancient country, has no archaeological records, no ancient manuscripts or historic buildings like those of Greece and Rome; however, in the past century and present, it has been honored by a class of men possessed of the highest intellectual ability, and contributed to make our country what it is to-day. The great French nationality took a noble part in early settlement. Champlain and Cartier paddled their own canoe up the majestic St. Lawrence, and laid down the principle of civil and religious liberty we now enjoy.

From that time forward, the English and French inhabitants of Canada, British subjects at heart, worked together as one, in building up and strengthening our country in every line of industry conducive to the welfare and prosperity of the Dominion, a comparatively short time each province of the Dominion was guided and directed by the outside world, of calibre, whose special endowments achieved pre-eminence in every walk of life. The province by the sea, received exceptional opportunities, the outcome of constant interchange of ideas with the outside world, was strengthening brain power and widening greatly the area of observation.

Confederation was grasped in 1864 and completed in 1867, stimulating a degree of prosperity truly remarkable. Following in quick succession, came the construction of the transcontinental C. P. R., the outcome of the confidence of our people, our ability to add this important link from ocean to ocean, to the power and prestige of the British Empire.

Twenty-five years ago, June 27, 1892, the first transcontinental train of the C. P. R. pulled out from Montreal for the Pacific coast, marking the consummation of the greatest work our people ever accomplished. Since that date, the growth and expansion of our country has been truly remarkable. Vast areas of wilderness proved Empire builders beyond doubt, forged this corporation to the front, by land and sea, the pride and admiration of our people. Its record fully justifies the name happily bestowed upon it "Providence Incorporated."

In 1898, it had two steamers on the Great Lakes, and now has 71 vessels on the rivers, lakes and oceans of the world, up-to-date in every particular, to meet the requirements of the traveling public. Hundreds of millions of dollars have been expended in double-tracking, lowering grades, removing curves, replacing old structures by scientific steel bridges, new stations, and branch lines, to push forward vigorously the transportation problem, so necessary for rapid settlement.

In addition to extensive car work, at desirable points, where thousands are in constant employment, it has its own telegraph and express services, and a perfect chain of palatial hotels, sanitary in every particular, to meet the requirements of thousands of visitors coming to learn the true source of our prosperity. This proof of progress, and the large scale of work, jointly owned by the company, is an endorsement of the C. P. R. note, which has justly placed its stock at the present high figure.

The number employed on the road, fully 80,000, experts in every department, stationed in almost every corner of the globe, hence the comfort and safety in operation of the corporation, and the protection to life and property that follows.

The Grand Trunk Pacific is now forging its way across the continent with remarkable rapidity to its attractive harbor and terminus, Prince Rupert, certain to become a distributing center of supplies to an extensive and undeveloped area of country west and north, bringing into notice products—fish, coal, iron, gold and lumber, and still better, large and extensive agricultural belts, equal to the best wheat-producing sections under cultivation in the west. Already the provinces of Quebec and Ontario are realizing the importance of interior development by this road, accomplishing for previous unknown section of country, what the C. P. R. has done in a masterly manner for the frontier of Canada and the great west.

Two young Canadian Scotchmen, Mackenzie and Matheson, who appeared on the surface a few years ago, as able expert contractors on the C. P. R. Their legendary exploits aroused considerable interest, and still more so when they undertook the

PURE MADE WHOLESOME IN CANADA

COCOA BAKING POWDER

CONTAINS NO ALUM RELIABLE ECONOMICAL

responsibility of the west transcontinental. They mastered their subject in every particular, studied carefully and judiciously industrial pursuits and unexplored agricultural areas as a basis of monetary supply, and today the leading financiers, at home and abroad, have every confidence in the future of the new and progressive highway to the Pacific, the marked success of which, by land and sea, has meritoriously achieved, at the hands of "His Majesty," for these pioneers, the highest honors of the crown.

Withing the past few years our agricultural development bounded forward. Just think of 300,000,000 bushels of grain, the growth of a single year, and as yet not more than ten per cent. of our wheat area under cultivation. Our fisheries have an annual value of fully \$25,000,000.

Our mines and forests are undoubtedly sources of wealth, and their conservation is being most carefully carried out.

A Problem in Hydraulics.
Archdeacon Renison, the new rector of the Church of the Ascension, Hamilton, has been for fifteen years the guide, guardian and friend of the Indians and inhabitants of the west coast of Hudson Bay.

He took the census of that country for the Dominion Government last year. Speaking at the organization dinner of the Canadian Club of Poreline on a recent evening, he, which, by the way, he had the distinction of being made the first honorary member, he told the following story: "A Calgary real estate boomer was trying to interest an eastern capitalist in properties of that city, after dilating at some length on the city's virtues, he said, 'You know there is a lake in the city, and in this city's vicinity to make it perfect, and that is a lake.'"

"He said the capitalist, 'That doesn't seem impossible. I would suggest that you lay a pipe from here to the lake, and if you can get it up here are half as good at sucking as you are at blowing you should be able to do it.'"

"How Grenfell Got Cars.
That the farmers of Grenfell, Sask., have had little trouble in obtaining all the empty cars needed for shipping their grain is the information given by G. D. Fitzgerald, of Grenfell, in an interview at Regina.

"When the demand for cars became strong at Grenfell the farmers enlisted the assistance of the Board of Trade. 'The officials of the Board of Trade at once took the matter up,' said Mr. Fitzgerald. 'The result was that we had 25 cars in very short time, and have not experienced any great difficulty in securing cars since that time. My opinion is that much of the hardship and trouble from car shortage is caused by irresponsible farmers placing their names on the order book long before they need the cars. I believe the proper solution is to change the law so that a farmer must give the railway company seven days' notice to supply a car, and if the farmer does not take the car then, let him forfeit a penalty. That is the course I favor, and if such a change was made, I believe much of the difficulty now experienced would be overcome.'

"Nursery" for Short.
A Stratford, Ont., druggist was much amused at a remark made a few days ago by a boy in his employ. The boy was told to deliver a package to the hospital. Arriving there, he knocked at the door, but as no one answered he went to the nurses' home and left it there.

Getting back to the drug store he reported on his delivery of the package thus: 'I couldn't make anybody hear at the hospital so I took it to the nursery.'

Cradle Robbers.
Two or three young men were exhibiting, with a great deal of satisfaction, the results of a day's fishing. One of the young men, a woman remarked, very demurely:

"Fish go in schools, do they not?" "I believe they do, but why do you ask?"

"Oh, nothing, I was just thinking that you must have been up an infant class."—Washington Star.

His Ideal.
Maud—I've heard of a case where a man married a girl on his deathbed so she could have his millions when he died. Could you love a girl like that?"

Jack—That's just the kind of a girl I could love. What's the address?"—Boston Transcript.

A traveler had climbed to the top of the monument of Bunker Hill. He and his companion had been viewing the surrounding country, when his companion remarked, "And this is the place where Wafell fell."

The traveler looked out at the surrounding country and then down at the vast expanse beneath, and hearing a great eagle soaring aloft, he wondered it killed him!—Ladies Home Journal.

Lost Time.

The late Sylvanus Miller, a civil engineer, who was engaged in railroad enterprises in Central America, seeking local support for a road, attempted to give the matter point. He asked a native:

"How long does it take you to carry your goods to market by muleback?"

"Three days," was the reply.

"There's the point," said Miller. "With our road in operation you could take your goods to market and be back home in one day."

"Very good, señor," answered the native. "But what would we do with the other two days?"—Boston Record.

ALONG THE LINE OF C.N.O. RAILWAY

DODD'S KIDNEY PILLS WORK WONDERFUL CURE.

Mrs. Ed. Lloyd, Weak and Worn and Wracked With Pain Found Relief and Cure in Dodd's Kidney Pills.

Arbrog, Ont., (Special).—"Dodd's Kidney Pills have done wonders for me," so says Mrs. Ed. Lloyd, wife of a well-known farmer living on the line of the C.N.O. Railway near here. "I was so weak and could hardly walk around," Mrs. Lloyd continues, "I suffered from female weakness and kidney trouble. My heart trembled so that at times I would almost faint with the palpitations. I was treated by the doctor but he could give me no relief."

"I was sick all over when I started to use Dodd's Kidney Pills, Rheumatism, Lumbago and Neuralgia added to my sufferings. But Dodd's Kidney Pills helped me almost at once. After taking eight boxes I was completely cured."

Naturally Mrs. Lloyd wants other sufferers to know how she was cured. She says: "I have found a cure, and Dodd's Kidney Pills will do for other sufferers just what they did for me. Mrs. Lloyd, make no woman of them."

Norwegian Water-Proof.
The water-proof of Norway, suitable for practical use all the year round amounts to 4,000,000 horse power. It is counted on during three-quarters of the year. The country thus has 45,000,000 horse power, which is equivalent to about 20,000,000 tons of coal. Putting the value of coal at four dollars a ton, the Norwegian horsepower is worth \$120,000,000 annually.

Shiloh's Cure
Cures all coughs, cures colds, breaks the throat and lungs. 25 cents.

Oriental Metaphor.
The Oriental speaks naturally in metaphor. Even the children continually use figures of speech which are often poetical and always suggestive.

The Washington Star thus quotes Bishop Odham, a missionary chaplain of the Methodist church. He writes from Singapore:

"I wish I could hear some of the expressive phrases of the native boys to me the abstemiousness of his father."

"He said, 'Such a very little!' Here he pointed to the ground. 'No more than the water in the holes made by a chicken's feet.'"

"He smiled and resumed: 'He ate nothing. A grain or two of rice contents him. You should see him at his meals. He is like a hound mauling flies.'"

Well, Well!

The Victoria Cross.

The Victoria Cross, which has just been extended by His Majesty to the Indian Army, was instituted fifty-five years ago. There have been 323 crosses conferred. One of the earliest recipients, General Sir Charles Doughty, has just entered his sixtieth birthday. His brother, General Sir Hugh Doughty, who died three years ago, won his during the Boer War. Only two instances other than this have the Victoria Cross gone more than once to the same family. Captain John Doughty, of the 1st Battalion, The Buffs, and his brother, Colonel of the South Lancashire Regiment, and his brother, the late Major-General R. W. Barton, both obtained it. In the other case, Field-Marshal Lord Roberts has the cross, and it was also awarded to his son after the Lieutenant's heroic death at Colenso.

A Deep One.
"Gosh, all hemlock!" exclaimed the first farmer; "ain't yer struck water yet? How deep hev' ye gone?"

"'Bout a hundred feet," replied the other placidly.

"Ain't sich ye discouraged?" "Oh, I dunno, I can't say I ain't 'till a long well."

Age of the Earth.
Professor Frank Allen, of Manitoba University, stated in a lecture on "The Age of the Earth" in Winnipeg that he had spent all the theories on this subject. "Lord Kelvin," said he, "who computed that the earth was 70,000,000 years old, declared that unless some new way of producing heat in the earth's surface could be found, his calculations were correct."

"Such a new way has actually been discovered in radium which has the power of giving out heat without diminishing in weight. One pound of radium would keep a house warm for 2,000 years. Radium is scattered throughout the earth's surface, and, therefore, Lord Kelvin's calculations are worthless."

"Radium gives off helium, and helium is scattered throughout the earth's crust," declared Professor Allen. "The amount of helium given off by an actual piece of rock could easily be estimated by measuring the amount of radium and helium in a piece of rock it would be possible to form an estimate of the age of the earth. If this were done it would be found that the earth was over 1,500,000,000 years old."

Miner's Linctant Relieves Neuralgia.
In New Zealand the postal authorities allow business houses to use stamping machines, which are sealed by the department before going into use. Periodical readings are taken by the postal departments and payment is made on a debit note.

One of the largest Marconi wireless stations on the British coast is to be erected on the North of the North Pembroke coast.

The number of new books published in France in 1910 was 12,253, as against 5,442 in 1812. But while in other countries the output of new literature in recent years has increased enormously, in France the number of books issued between 1901 and 1910 exceeded the number issued between 1860 and 1869 by only 104, the total being 129,253 and 129,149, respectively.

Going Up.
"Eureka!" exclaimed Hiram Hoskins, who, with a lighted candle in his hand, was hunting for a leak in the gaspipe.

A moment later Mrs. Hoskins sadly said: "That's just our luck. Now we will have to pay out money to get the roof fixed."—Chicago Herald.

AN EXCELLENT MEDICINE FOR ALL LITTLE ONES
Mrs. Ovilla Lamorne, Malvinia, Que., writes: "I have found Baby's Own Tablets an excellent medicine—and I have used them for all other little ones. I think all mothers should keep the tablets in the house. They are so easy to use, and they give the same praise for the tablets. They are absolutely safe—being guaranteed by a government analysis to contain no opiate or other harmful drug. They break up colds, expel worms, cure constipation and indigestion. In fact, they are good for all the minor ills of the little ones. The tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont."

A Can Prizer.
A broken fork would almost seem to be the last thing in the world, for which a useful purpose could be found, but in a certain direction it can be made into a useful and valuable accessory. Grind or break off the prongs to just that point where they become curved, and you have the handle of the fork. The purpose for which it will then make a most excellent tool for the prying open of cans of tinned strap type. Materialism will then have no more complaints against Mary Jane for misuse and damage to the ordinary cutlery.

How to Change the Color of a Cat.
Remarkable as it sounds, it is the best method of preserving meat on board ship. Professor P. A. Ellis Richards, lecturer at St. George's College, told the story of a certain cat, which had slipped into the hold of a vessel bringing meat from Buenos Ayres and had been there immersed for the whole voyage.

The animal fared excellently during its incarceration, as was apparent when the cold storage compartment was opened in London and the cat walked forth, plump and sailing. The only difference observable was that the Arctic rigors of its recent environment had changed the color of its fur from black to white.

Suppose all the telegraph lines in the world could be combined and joined in one straight line, they would encircle the earth thirty-six times.

You cannot afford brain-befogging headaches.

NA-DRU-CO Headache Wafers

stop them in quick time and clear your head. They do not contain either phenacetin, acetanilid, morphine, opium or any other dangerous drug. 25c. a box. Your Druggist's.

BRUCE'S SEEDS

The Standard of Quality Since 1850
An experience of over sixty years in the seed business in Canada, and our long connection with the Best Growers of the World, gives us advantages which few other seed houses possess; added to this our careful system of testing all our seeds for purity and germination, and the great care exercised in every detail of our business, brings to us every season many pleased customers, to add to our already large list of patrons.

SHIPPING BY MAIL. It is most fascinating, enjoyable, and profitable pursuit. You can in a few days, and with perfect safety, though far removed from the source of supply, have delivered at your door—

Bruce's Seeds! The Seeds that satisfy.
All you require to do is to send us a post card asking for our handsome illustrated 112 page Catalogue of Seeds, Plants, Bulbs, Impatiens and Pastry Supplies, which will be sent free of charge, and on receipt of name and address. Write for it now!

John A. Bruce & Co., Ltd., Hamilton, Canada.
The Pioneer Seed House of Canada.

A Radical contemporary tells the story of an Indian frontier tribe which having been feared at by another tribe because it possessed no tomb of maim, went out, killed a well-known holy man, and buried him—London Globe.

Benham—We need a reform in our bank system.
Mrs. Benham—Yes; it's a shame that a wife can't overdraw her husband's account!—Judge.

London hospitals now all employ electricity to aid the diagnosis and cure of diseases.

There's The Rub
Why is it that you are so strongly opposed to extending to women the right to vote?
"My wife has become a suffragette."
"Well, what of it? Do you find that she neglects the children or that she isn't paying enough attention to the business of running the house?"
"No, it's not that. She's become so blamed well informed on public matters that she has to keep her husband all the time in order to prevent her from finding out my ignorance concerning such things."—Judge.

ALBERTA HOTEL IS BEING MADE LARGER

The Hotel Business in Blairmore Increases with the Population and Every Effort Being Made to Cope with the Situation.

The future in store for Blairmore has led Messrs Sick & Simpson, the proprietors of the Alberta hotel, to take steps towards the enlargement of their hostelry and to prepare themselves for the business which must necessarily come their way. With this end in view, they have decided to renovate the present structure and to make a large addition thereto. Part of the old building is being hauled back about seventy feet and a new addition, 70 feet long, 25 feet wide and with two stories, will be erected on the corner of Fifth avenue and Victoria street. The ground floor of this new addition will be used as a bar room and barber shop while the upstairs will be made into bedrooms furnished with private baths and fitted up in the very latest style.

An addition will also be made to the western portion of the present building. The office will be enlarged and the dining room will be changed to the north-west corner. Twenty-two bedrooms in all will be added and when completed the Alberta will have a first-class appearance and will be classed as one of the best hotels in this district.

Thomas Cyr has the contract for moving the old part, and tenders for the erection of the new addition are now being sought. It is the intention of the owners to have all improvements completed by July.

The owners in building the new addition, are so arranging the construction as to permit them to carry out their intentions of putting up a 800,000 brick structure in the course of the next two years when the business of this town is sure to demand such a public house.

The New Sidewalk Attracts Night Travellers

The West Canadian Collieries have just about completed laying the sidewalk along the main street on their property, at the west end of Blairmore, to the corner of Fourth avenue and Victoria street, a distance of over a quarter of a mile, and many cheerful couples have already taken walks in that direction during the night besides the innumerable crowds whose duties call them in that direction during the day. This sidewalk is quite an improvement to that part of the town and it is gratifying to note the efforts displayed by the West Canadian Collieries in beautifying this place and in doing their share towards making Blairmore the most up-to-date town in the whole of Southern Alberta. The town council have agreed to put in the crossing, and this will be proceeded with immediately. We would like to suggest that the town council of Coleman be now asked to lay a sidewalk to connect with the one at the extreme west end of Blairmore.

1,000 BARRELS OF CEMENT PER DAY

The Rocky Mountain Cement Co. Making Great Effort to Meet the Growing Demand for Their Product.

The Rocky Mountain Cement Company have almost completed the installation of considerable machinery which arrived some time ago so as to place them in a better position to supply the growing demand for their product which is considered by the builders with whom we have come in contact, as being second to none manufactured on this continent. The fire of last Saturday morning has somewhat interfered with the work of installing the new machinery but a representative of this journal was informed by the general manager, Mr. C. J. Pegg, that the new machinery would be installed and the plant in operation again early in May.

The additional machinery which is being installed at the already large and well-equipped cement plant consists of a new rotary kiln, 109 feet in length and eight feet in diameter; a complete set of elevators, conveyors and all accessories connected with the kiln; a complete and new battery and pulverizer for the finished grinding department, and several smaller pieces of new and heavy machinery.

When the Rocky Mountain Cement Company put their Blairmore plant in operation again the capacity will have increased from 400 to 1,000 barrels of cement per day, and then this town will have one of the largest and best equipped cement mills to be found in this part of the country.

Easy Money for the Exchequer

The sinners' bench at the court room was occupied on Monday afternoon last by eight females from the tenderloin district. Justice Lyon presided. The proceedings were very quiet except at times when the jingling of silver dollars or the ruffling of ten dollar bills disturbed the silence which had become monotonous. Ida Evans, Rita Norwood, Alley Huski, Lena Paul, Chiois Langston and L. Ayeroff were up on a charge of being inmates of a house of ill-fame. They pleaded guilty and each one was fined \$10 and \$5 costs. Lottie Wilson and Hannah Yawaskita were charged with having sold intoxicating liquors without a license. They declared themselves guilty and each paid \$100 and \$3 costs. The court did not last more than half an hour and during that time the sum of \$284 was taken in, \$100 of which goes to the provincial government and the remainder goes to the town of Blairmore. The girls were well stocked with money, and when Lottie was called upon to settle the claim the court had against her she produced a roll of bills that would stagger a Forty-niner.

Nothing succeeds like success and the appearance of prosperity begets it.

People Leave "Land of Nod" to Fight Fire

Early on Saturday morning last the wild screeches of a steam whistle aroused many from their peaceful slumbers and many pleasant dreams were abruptly broken. The whistle was a call from the Rocky Mountain Cement Company for help to fight a fire which threatened to destroy that entire plant, and right royally was the call responded to. At 4 o'clock, just as most of the people had gotten home from the Telegraphers' ball, fire was discovered in the coal mill of one of Blairmore's chief industries and it looked at one time as if the entire works would be gutted. The Blairmore fire brigade and a large number of willing citizens hastened to the immediate scene of the conflagration. The Cement Company soon got their hose at work and checked the flames. The fire brigade from Frank together with a small army of the citizens from our neighboring town responded to the call for help and did praiseworthy work in fighting the fire and in confining it to one building. The Coleman firemen also came but were too late to render any assistance. The fire was caused by spontaneous combustion in the coal mill. On Wednesday the insurance ad-
